Projects

Zomato Clone – End-to-End DevOps Pipeline: Github **Sep-Nov 2025**

- Engineered a scalable food delivery platform specifically to demonstrate enterprise-grade deployment automation
- Orchestrated a complete CI/CD pipeline utilizing Jenkins for integration and Kubernetes for container orchestration
- Achieved fully automated build-to-release cycles with zero-downtime updates and high system availability

Tech used : Git, GitHub, Jenkins, Docker, Kubernetes, Node.js, Express.js, React.js

AI-Powered Task Manager – Full Stack: Github **Mar-May2025**

- Developed an intelligent productivity application designed to optimize workflow through AI-driven task prioritization
- Architected a robust backend using Node.js and MongoDB with integrated smart algorithms for data handling
- Delivered a secure, responsive interface featuring real-time status synchronization and dynamic user authentication

Tech used : React.js, Node.js, Express.js, MongoDB, OpenAI API

E-Commerce Website: Github **Oct-Dec 2023**

- Designed a dynamic frontend interface to facilitate seamless product browsing and intuitive online purchasing
- Constructed interactive UI components using semantic HTML, CSS for styling, and JavaScript for logic
- Implemented a fully responsive, mobile-first layout with functional cart management and smooth navigation

Tech used : HTML5, CSS3, JavaScript, Bootstrap, Git, GitHub

TRAINING

Data Structure and Algorithm using Java Programming **May-July 2025**

Cipher Schools | Certificate

- Undertook an intensive training program designed to master algorithmic efficiency and software architecture in java
- Implemented complex data structures including trees, graphs, and linked lists to solve algorithmic challenges
- Enhanced core programming proficiency through rigorous hands-on coding labs and real-time logic optimization

CERTIFICATES

- Git and Github – Cipher School | *link* **Dec 2025**
- Full Stack Web Development- Udemy | *link* **Jul 2025**
- Learn Python Programming – Beginner to Master – Udemy | *link* **Dec 2023**

Skills

Languages C++, Java, JavaScript, Python

Technologies/Frameworks:docker,Jenkins,ansible,Kubernetes, Git, GitHub, Ubuntu

Domain Skills: ci/cd pipeline , cloud computing, web and app automation and monitering

Education

Lovely Professional University **Phagwara - Punjab**
Bachelor of Technology - Computer Science and Engineering — CGPA: 7.5 *2023 - Present*

Central Public School **2020 – 2022**
12th — Percentage: 87% *Kota, Rajashthan*

Sanskriti Public School **2019 –2020**
10th — Percentage: 93% *Motihari, Bihar*
